24 August 1967

Emergency Power--Headquarters Building: Today I had a briefing by the Office of Logistics on the requirements for emergency power at Headquarters Building to accommodate the Office of Communications and the air conditioning systems for RID and OCS. The problems posed called for additional consideration and certainly additional funds to resolve the issues. I asked for a second meeting with representatives from all interested parties--DD/S&T, DD/P, PPB, etc. which was called on 1 September. At that meeting we agreed to an alternative plan which will require an additional \$600,000 more than presently provided for. I have asked Logistics to prepare a briefing of Colonel White for consideration of the problem and the monies involved in settling the problem.
